SHIHAS ES

Business Intelligence Analyst

shihases@gmail.com | +91 9061674726| India| linkedin.com/in/shihases |Open for Relocation

Certified BI Analyst with 5+ years of experience developing Power BI dashboards, semantic models, and Azure data pipelines across insurance and retail sectors with hands-on expertise in SQL, Python, DAX, ADF and Databricks.

Technical Skills

Languages: SQL, Python, PySpark, DAX, M Language

Tools: Power BI, Power Query, Microstrategy, Azure Data Factory, Databricks, SAS, ADLS, Excel,Jira

Concepts: Data Visualization, Data Modelling, Data Warehousing, Data Transformation, ETL, RLS, Requirement Gathering, Data Storytelling, Cloud Computing, Error Handling, Performance Optimization and Stakeholder Management

Experience

BI Analyst, Allianz Services Private Limited – Technopark, India April 2024 – Present

- Developed Power BI models and dashboards using Direct Query, Live Connection, and Import modes — implementing DAX measures and RLS to deliver secure, real-time reporting for UK stakeholders in an Agile environment.
- Optimized Semantic data models using Star Schema, aggregated tables, and incremental refresh to reduce report load times by ~75% and cut query costs aligned to business SLAs.
- Built MicroStrategy Dossiers with OLAP cubes and wrote complex SQL queries to enable self-service analytics, reducing ad hoc data requests to the analytics team by ~50%.
- Architected an end-to-end data platform using Azure Data Factory, Databricks, and Delta Lake (Medallion architecture) to eliminate manual data handling and deliver production-ready insights via Power BI.

Junior Data Analyst, Bilagos Softwares Private Limited – Technopark, India May 2023 – Apr 2024

- Developed Power BI dashboards and visualizations using DAX measures and Star Schema models, gathering business requirements directly from stakeholders to ensure reporting accuracy.
- Validated dashboard figures against source systems using SQL queries to ensure data accuracy, and automated MIS reporting via Excel VBA — reducing manual effort by 50%.

Purchase Associate (MIS Analyst), Style PLUS – Trivandrum, India Mar 2022 – May 2023

- Developed Power BI and Excel reports to track purchasing KPIs, inventory trends, and supplier performance — enabling data-driven procurement decisions.
- Automated Excel MIS templates for procurement operations to standardise and accelerate monthly reporting, reducing manual effort and turnaround time.

Accounts Assistant, Navin Associates - Trivandrum, India Nov 2018 – Sep 2020

- Built Excel-based MIS dashboards using Advanced Excel to track key financial metrics, giving management timely visibility into business performance.
- Supported month-end close by managing accounts reconciliation and ledger maintenance using Excel, ensuring accuracy of financial records.

Projects

End to End Azure Data Platform github.com/Shihas-ES/Data-Engineering-Project

- Architected a complete Azure data platform: ADF (SHIR) → ADLS (Medallion architecture) → Databricks (PySpark transformations) → Synapse Analytics → Power BI dashboards — demonstrating full pipeline ownership from ingestion to insight delivery.

Certifications

Microsoft Fabric Data Engineer Associate - (DP-700) **-** Credentials Databricks Data Engineering Associate - Credentials

Education

University of Kerala – Bachelors in Commerce Feb 2018

Bharathidasan University – Masters in Computer Applications Jan 2026 (In Progress)
