PROFESSIONAL SUMMARY

Results-driven Data Analyst / BI Developer with **3+ years of experience (2022–Present)** delivering data-driven solutions in the insurance domain. Expertise in **SQL, Power BI, Python, ETL processes, and data modeling** to transform large-scale datasets into actionable insights. Proven track record of improving reporting efficiency by **30–40%** through automation and optimization. Skilled in **dashboard development, KPI tracking, data visualization, and stakeholder collaboration** to support strategic business decision-making.

PROFESSIONAL EXPERIENCE

BI Developer / BI Analyst
Allianz Services, Technopark, India

Apr 2023 – Present

- Designed and deployed interactive dashboards using **Power BI and MicroStrategy**, enabling KPI tracking for claims and operations teams.
- Built and optimized **data models and ETL pipelines**, improving data refresh performance by **30%**.
- Developed complex **SQL queries** across SQL Server and Snowflake to extract, transform, and analyze large datasets.
- Automated reporting workflows using **Python, Alteryx, and SAS**, reducing manual effort by **40%**.
- Performed **data validation, reconciliation, and quality checks** ensuring high data integrity and governance standards.
- Created advanced Excel reports using **Pivot Tables, VLOOKUP, and Macros** for ad-hoc analysis.
- Implemented scalable data processing workflows using **Azure Data Services and Databricks**.
- Collaborated with cross-functional stakeholders to define **KPIs and reporting requirements**.
- Delivered actionable insights through **data storytelling and visualization**, improving decision-making efficiency.
- Worked in Agile environments using **JIRA** to manage sprint-based deliverables.

Business Analytics Intern
Allianz Services, Technopark, India

Nov 2022 – Mar 2023

- Developed Excel-based dashboards for **sales and profit analysis** using advanced formulas and visualizations.
- Built a **Voice of Customer (VoC) chatbot** using NLP for sentiment classification and feedback analysis.
- Automated customer feedback processing, significantly improving reporting turnaround time.
- Supported project documentation and collaborated with cross-functional teams to deliver analytical solutions.

PROJECTS

Voice of Customer (VoC) Chatbot

- Designed and developed an **NLP-based chatbot** to automate customer feedback analysis.
- Implemented **sentiment classification and theme identification** for actionable insights.
- Reduced manual analysis effort and improved reporting efficiency through automation.
- Integrated outputs into dashboards for real-time business intelligence reporting.

CORE SKILLS

- SQL, Python, R (Basic), DAX
 - Power BI, MicroStrategy, Tableau (Basic)
 - Data Modeling and ETL Pipelines
 - Data Visualization and Dashboard Development
 - KPI Analysis and Reporting
 - Data Warehousing and Data Governance
 - SQL Server, MySQL, Snowflake
- Azure, Databricks, AWS (Basic)
 - Advanced Excel (Pivot Tables, VLOOKUP, Macros)
 - Alteryx, SAS, Power Automate
 - JIRA, Git, SharePoint
 - Data Quality, Validation, and Reconciliation
 - Stakeholder Management
 - Data Storytelling and Business Insights

CERTIFICATIONS

- Microsoft Power BI Data Analyst Professional Certificate
- MicroStrategy Departmental Analyst
- Alteryx Masterclass
- Python Pro Bootcamp

EDUCATION

MSc Computer Science (Data Analytics) Rajagiri College of Social Sciences, MG University Score: 71%	2021 – 2023
BSc Mathematics NSS Hindu College, MG University Score: 80%	2018 – 2021
